ABSTRACT

This questionnaire assesses drug use and attitudes toward drugs among college students. The 24 multiple choice items deal with personal data, use practices, use history, future use, and drug laws. The instrument is untimed and self-administering. Item response data and findings for a sample of 2,145 students are reported in: "A Survey of Drug Use at Ithaca College," Martin E. Rand, J. David Hammond, and Patricia J. Moscou in The Journal of The American College Health Association, October 1968, Vol. 17 Number 1. (DLG)
